pledge my support to the work of Humane Research Australia.

I agree that:

1. Animal-based research can be dangerously misleading when applied to human health;
2. Throughout history, animal-based research has led to many health catastrophes¹ and delays² in medical progress;
3. The use of non-animal research methods such as computer-modeling, epidemiology and in vitro tests provide safer, more ethical and scientifically-valid ways toward real medical progress.

Signed:

Please indicate whether you would be willing for your name to be made public as having signed our pledge:

Yes

No

After signing, please return your pledge to:
Humane Research Australia Inc.
PO Box 517, Heathmont, Vic 3135
